

Project Overview

Structbay is a B2B construction material marketplace that provides a one stop shop for builders and contractors to buy construction materials. Structbay has direct partnership with brands such as Ultratech Cement and Asian Paints. After customer places an order, material is picked up from city warehouses of the brands and delivered directly to customer

Structbay manages vendor allocation, pricing, invoicing, dispatch workflows, and city-based inventory.

Unlike a traditional marketplace, vendors cannot manage products or pricing. All product management is controlled by Structbay administrators.

The system will support:

City-wise pricing - MRP, sale price and multiple wholesale prices (details below)

RFQ forms for few products such as concrete that do not have fixed price

Structbay Finance - Form for loan enquiry by builders (format given)

City-wise stock management

Vendor assignment after order placement

Multi-vendor order fulfillment

Invoice workflow management

Delivery workflow management

Play store and app Store apps to be developed

Guest checkout will not be allowed

Form for bulk order with file upload option (pdf, excel and images) with template example to customer

User Roles

Admin (Structbay)

Admin will have full access to:

Product Management

Vendor Management

City Management

Order Management

Vendor Assignment

Pricing Management

Stock Management

Invoice Management

Reports of Key Performance Indexes

Notifications

Vendor

S to customer updates

Order Placed

Order processing

Out for delivery

Partial delivered

Full delivery complete

Give a text box for admin in which admin can update Detailed Delivery Details.

Give order wise chats for admin and customer chat

City Management

Admin can create unlimited cities.

Every city will contain:

- Regular Price
- Sale Price
- Wholesale Prices for different MOQs (3-5 slabs)
- Inventory

City Validation

Customer selects city before shopping

If:

Selected City = Bangalore

Delivery Address = Delhi

System will:

Block Checkout

Show Serviceability Message

Pricing Management

Each city will support:

- Regular Price
- Sale Price
- Stock
- Wholesale Pricings for different quantities (3-5 slabs)

Inventory Management

Inventory managed by StructBay.

Features:

City Wise Stock

Automatic Stock Deduction

Stock Visibility by City

If city stock unavailable:

Product invisible

Vendor Assignment

Products are not linked to vendors during product creation.

After order placement:

Admin manually assigns vendors.

Multi Vendor Orders

Example:

Order: Ultratech Cement and Asian Paint

Ultratech Cement to Vendor A

Asian Paint to Vendor B

Same order can be split across multiple vendors

Order Numbering

Master Order:

YYMMDD0001

Example:

102605310001

Vendor Orders:

2605310001-1

2605310001-2

2605310001-3

Each assigned vendor receives a separate sub-order

Cancellation Policy

Customer can cancel order before:

Out for Delivery status

After dispatch:

Cancellation Not allowed

Discuss on call again

Replacement Policy

Allowed only when:

Wrong Product Delivered

Damaged Product Delivered

Replacement managed by StructBay

Discuss on call again

Payment Management

Payment Gateway:

Zoho Payments

Rules:

Full Payment Only

No Partial Payments

Payment Status:

Pending

Paid

Failed

Structbay Assured

Admin can mark products as:

Structbay Assured (similar to Homerun)

Badge visible on:

Shop Page

Category Page

Product Page

Structbay Express

Admin can enable Structbay Express on selected products.

Badge visible on:

Shop Page

Product Page

Purpose:

Same Day / Priority Delivery Products

Brand Management

Brands should be visible on Category Page with click able brand products Page

Only brands associated with products in that category will appear.

Example:

Category = Cement

Visible Brands:

Ultratech

ACC

Ambuja

JK Cement

Home Page should have top selling products for promotion

Etc

Variation Selection on Listing Pages

Variation dropdowns should be visible directly on:
Shop Page
Category Page
Search Results
Customer can select variation before opening product page.

Concrete RFQ Module

Concrete category products can use RFQ flow.
Fields:
Name
Company Name
Phone Number
Grade Of Concrete
Floor Level Of Concreting
Quantity (Cubic Meter)
Site Address
Admin receives RFQ submissions as RFQCONYYMMDD0001 - example RFQCON2606120001

Global Bulk Enquiry Module

Header Menu:
Bulk Enquiry
Fields:
Name
Mobile Number
Company Name
Email
Delivery address
Text box with example message "Product - Quantity" this is optional
Upload documents with image or pdf or excel. This is optional
Text box or upload documents any one is mandatory
Remarks text box for any special instructions

Account login has to be created to submit rfq

Details for customer account creation

Name
Company name
Mobile Number
Email I'd
Billing address
Gst Number

When customer checks out billing details to be filled automatically with option to edit

Additional Delivery Charges

Display:
"Additional Delivery Charges Applicable. Charges to be paid at site."
Visible on:
Product Page
Cart
Checkout
Home Page top

Notifications

Vendor Notifications
